SUMMARY

Engineering Manager / AI Platform Leader with 12+ years of experience building and scaling production AI systems, developer-facing platforms, and distributed services. Proven track record leading engineering teams and owning end-to-end delivery of AI solutions, from exploratory development and system architecture through production deployment, operations, and continuous improvement. Hands-on experience with Python, LLM/agentic application frameworks, APIs, ML platforms, cloud infrastructure, CI/CD, and observability, with a strong focus on technical execution and cross-functional collaboration.

KEY AI PRODUCTS

- **Built and scaled a unified Data & AI platform** supporting ML experimentation, training, deployment, real-time inference, CI/CD, observability, and governance across teams.
 - **Architected an agentic conversational analytics platform** using Snowflake metadata, secure SQL execution, and LangChain/LangGraph orchestration, enabling natural-language access to enterprise data.
 - **Led and scaled a multi-disciplinary engineering team** of 7+ Data Scientists and 4+ ML Engineers, providing technical direction, architecture guidance, mentoring, and production ownership.
 - **Owned end-to-end delivery of production AI systems**, from exploratory prototyping and system design through API integration, deployment, monitoring, and operational improvement.
 - **Established engineering practices for production AI**, including CI/CD, observability, model lifecycle management, governance, and reusable infrastructure, reducing deployment cycles by ~60%.
 - **Partnered across product, engineering, business, and client teams** to prioritize AI capabilities, translate ambiguous requirements into technical solutions, and deliver systems generating USD 1M+ in commercial impact.
-

WORK EXPERIENCE

Collinson Group, Singapore, India

Jan 2023 - Present

Manager, Data Science

- **Led and scaled a multi-disciplinary team of 7+ Data Scientists and 4+ ML Engineers**, providing technical direction, architecture guidance, mentoring, and production ownership for AI systems.
- **Built and scaled a unified Data & AI platform** using Snowflake, AWS, and Prefect, supporting ML experimentation, training, deployment, real-time inference, CI/CD, observability, and governance across teams.
- **Architected the Agentic Conversational Analytics platform**, enabling natural-language data access for finance and analytics teams by combining **Snowflake metadata, secure SQL execution, and LLM orchestration (LangChain / LangGraph)**, improving analyst productivity by ~30%.
- **Partnered with product, engineering, and business stakeholders** to define **AI roadmap and use case prioritization**, aligning technical execution with customer and commercial goals generating USD 1M+ in commercial impact.
- **Established production engineering practices** including CI/CD, observability, governance, and reusable ML infrastructure, reducing deployment cycles by ~60% and improving reliability.

OCBC Bank, Singapore

Jan 2022 – Dec 2022

Senior Data Scientist & Commercialization Product Lead

- **Designed and deployed scalable ML services** supporting both batch and low-latency online inference using Spark, Ray, and AWS, improving pipeline efficiency by ~70%.
- **Built production AI capabilities for fraud detection and personalization**, integrating ML-driven decisions with customer-facing and core banking systems through scalable service interfaces.
- **Established CI/CD, observability, and production-readiness practices** for ML services, enabling auditable releases, monitoring, and reliable operation in a regulated environment.
- **Provided technical leadership across data science and engineering**, guiding system architecture, API contracts, deployment practices, and production readiness while collaborating with product and business stakeholders.

IHS Markit, Singapore

Nov 2016 – Dec 2021

Data Scientist & Product Manager

- Owned roadmap and delivery of a **Big Data analytics platform** for APAC financial clients, doubling adoption through tailored analytics and ML-driven solutions.
- Delivered ML-powered investment and analytics products (forecasting, classification models) that **outperformed benchmarks by ~30%**, directly influencing product strategy and client adoption.
- Designed and deployed scalable data and ML systems on AWS (EMR, Glue, Redshift), reducing data processing time by **40%** and enabling faster analytics workflows.

IHS Markit, Singapore - India

Aug 2013 – Oct 2016

Digital Transformation Specialist

- Led 0→1 automation initiatives, including an NLP-based email classification system that reduced manual effort by **18 hours per day** across global operations.
- Served as an innovation SME, helping teams adopt automation, analytics, and early AI to improve operational workflows.

SKILLS

- **AI & Developer Platforms:** LLMs | LangChain | LangGraph | LlamaIndex | Agentic Workflows | RAG | AI Architecture
- **Backend & Integration:** Python | FastAPI | REST APIs | Microservices | Async Processing | Service Integration
- **ML and Systems AI:** NLP | Recommender Systems | Forecasting | Classification | Model Serving | | Model Evaluation
- **Platform and Production Engineering:** CI/CD | Automated Deployment | Observability | Monitoring | ML Lifecycle Management | Model Registry | Docker | Git
- **Cloud & Infrastructure:** AWS (SageMaker, EMR, ECS, Lambda, Step Functions, Glue, Redshift) | Spark | Ray | Snowflake | Distributed Data Processing
- **Engineering Leadership:** Technical Strategy | Architecture & Design | Team Building | Hiring & Mentoring | Roadmap Planning | Cross-functional Leadership | Production Ownership

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering

Jun 2009 - Jul 2013

Guru Gobin Singh Indraprastha University, Delhi, India

- **CGPA- 8.11/10**

Certifications

- AWS Solutions Architecture - Associate
